Cases in Financial Management provides a series of original case studies in corporate finance, many of which are cases based on actual corporate events and on the authors' teaching and consulting experiences. Accompanied by sophisticated and detailed proposed solutions, this case book goes beyond simple textbook mini-case applications to shed great clarity on the application of financial management and market principles for both students and professionals, including consultants, accountants and attorneys who are advising corporate clients.

This book links the theory of finance to the decisions related to various aspects of the financial management of an organisation. In order to provide the reader with a better understanding of the concept of finance, a theoretical guide to related terminology is included here. The case studies brought together require students to look deep into the concepts of finance in order to solve the problems and issues they present. The case studies here focus on important concepts of finance which help students to relate the concept with decision-making processes.
