For the purpose of this report, "public swimming pools" refers to facilities intended for use by the public in such areas as parks, hotels, motels, resorts, multiple-family apartment complexes, municipal pools, commercial public facilities, schools, universities, swim clubs, golf clubs, tennis clubs, and fitness clubs.

The INTERNATIONAL SWIMMING POOL AND SPA CODE (ISPSC) is the first comprehensive swimming pool code that coordinates with the provisions of the International Codes to meet the requirements of the Virginia Graeme Baker Act for upgrading pool safety. Developed with the support of the Association of Pool and Spa Professionals (APSP), the codebook encompasses the design, installation and inspection of aquatic facilities, based on the current ANSI (APSP) standards, technology, and code provisions. Coverage includes public swimming pools, public spas, permanently installed residential spas, above-ground/on-ground residential swimming pools, residential in-ground swimming pools, portable spas, aquatic recreational facilities, barriers for all residential pools and spas, and water quality and suction entrapment avoidance for these facilities. Fall protection guards for springboards that are greater than 5 feet (1.5 meters) above a pool deck are now required. The guards will significantly reduce injuries from falls from high springboards.

The only comprehensive swimming pool code coordinated with the current requirements in the I-Codes and APSP standards. Developed with the Association of Pool & Spa Professionals (APSP), to establish minimum regulations for public and residential pools, spas, and hot tubs using prescriptive and performance-related provisions. The ISPSC integrates seamlessly with the family of I-Codes and contains requirements that meet or exceed the Virginia Graeme Baker Act. The ISPSC also contains APSP-7 Standard for Suction Entrapment Avoidance. Important changes in the 2021 ISPSC include: It was clarified that flotation tank systems for sensory deprivation therapy are not within the scope of the ISPSC. Hot water storage tanks are now required to be listed and labeled to a standard. New sections were introduced into the code to cover solar thermal water heating systems. Installation requirements refer to the IMC.

Public swimming pools and spas with certified operators had significantly fewer violations per inspection than did the public swimming pools and spas with operators not certified. There were also significantly fewer critical violations and immediate closures for the pools and spas with certified operators. These findings suggest that pool operator certification is a useful tool in increasing compliance, thus protecting public health.

The Pool & Spa Operator(tm) Handbook, the official text for the Certified Pool/Spa Operator\u2122 (CPO\u2122) certification program has been written to provide information and guidelines for the operation of spas and swimming pools used by the public.

This text presents lifeguarding skills that participants will learn in Ellis & Associates' National Pool and Waterpark Lifeguard Training Program, integrating CPR, first aid, AED, and oxygen administration into one curriculum. Step-by-step instructions and guidelines are given for rescuing drowning

From nineteenth-century public baths to today's private backyard havens, swimming pools have long been a provocative symbol of American life. In this social and cultural history of swimming pools in the United States, Jeff Wiltsie relates how, over the years, pools have served as asylums for the urban poor, leisure resorts for the masses, and private clubs for middle-class suburbanites. As sites of race riots, shrinking swimsuits, and conspicuous leisure, swimming pools reflect many of the tensions and transformations that have given rise to modern America.
